### Education

Technological University of Ciudad  
Juarez

Technician in Information  
Technologies – Software

Development Area  
Software Development  
Engineering – 5th semester

English level: B1 Basic

### Key Skills

#### Programming languages

- Python
- TypeScript
- Javascript

#### Frameworks

- Angular
- Ionic
- Node
- Flask

### Objective

I am a junior programmer currently studying Software Development Engineering, seeking new challenging projects. I consider myself a responsible, organized person with strong teamwork skills. I enjoy learning new processes, am open to new ideas and technologies, and constantly strive to improve by acquiring new knowledge.

### Leadership

I am a person who can take initiative within projects to achieve progress once I understand the topic.

### Communication

Communication has not been a problem for me, as I am able to communicate assertively with my teammates, fostering a good work environment and successful project completion. I also support and assist my coworkers whenever possible to achieve better results

### Courses and Certifications

Cisco:

- Networking Certification
- Network Interconnection Certification

Index course:

- Index English Course Completion Certificate
- Index Course Completion Certificate

Udemy courses:

- Currently taking courses to strengthen skills in Angular, JavaScript, and SQL.
